Key Skills

Team-Oriented
Multi-Tasking
Can Thrive Independently
Written and Verbal Communication
Problem-Solving

Objective

Self-taught developer with experience in HTML, CSS, JavaScript and React, who is eager to apply my skills to obtain real world experience and knowledge and to continue learning throughout the journey.

Relevant Coursework

JavaScript: Fundamentals and Advanced Topics, Responsive Web Design and Intermediate CSS, Building Apps with React.js, Data Structures and Algorithms

Programming Languages and Frameworks

>HTML

>CSS

>JavaScript

>React

Project

- Built an app using JavaScript and React that allows you to add tasks and keep track of how long it takes you to complete them. In this project I learned how to connect to a server to allow the timer to keep going even if the app is closed. I also worked with stateful components and inverse data flow.

Certifications

- FreeCodeCamp Responsive Web Design Certificate
- FreeCodeCamp JavaScript Algorithms and Data Structures Certificate
